Everything I have written in this book I have personally experienced from being in the trenches and battling the Smart Money for profits and I hope that once you read this whole book through the first time you will not have to go through what I did when I was first coming up and learning investing and trading. The road to success in investing and trading is paved with the smoking blown up accounts of investors and traders. It did not have to be a long hard and expensive road. It can be a road paved with gold and be fairly easy if you just take time to learn this business the right way from the start on your first day. Keep it simple and it will be. In this book I give you brutally honest realism of investing and trading and what you need to know. The GOOD and the BAD before you even start to study anything. I tell you everything NOT to do that causes people who come into this business with dollar signs in the eyes to get FUBAR by the Smart Money. I give simple explanations that even a 12 year old can understand. If you read a passage in this book and it says hey "don't do this" then guess what? DON'T DO IT!! You can use this book and the references, suggestions and tips in it to go further into your educational studies of the markets and there dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd. By the time you complete your reading of this book you will know: The first information to study to get you going in the markets. How and where to get information.
