## **Logical Death** Robert J. Hanink

The book, *Logical Death*, is a story written by a self-proclaimed Manic-depressive Junkie, and reveals his search as to whether existence has any meaning or purpose. *Logical Death* is a book of seven distinct chapters, each with a common thread of bipolar emotions woven into philosophical and mildly scientific observations of life on the earth - written only during moods of hypomanic or depression. The best description of the sentence structure is that it is written in a "thought disorder" of some type. All the protocols of bipolar behavior are found throughout the text and thought processes. The sentences are long, illogical, and sometimes out of place or simply inappropriate from what you would normally expect in a published book – but they are always unique and interesting. Most of the initial readers of *Logical Death* simply can't believe a book is this unique in style and content.

Do you have a bipolar friend or relative, or are you just a curious person? *Logical Death* could offer you help in understanding how a different perception of reality could be acted on as valid. In it the emotional states of Hypomanic and depression are used to define reality, as opposed to the expected processes of analytical logic and deductive reasoning. Perhaps you actually share many of these insights to life, love, death, God, and the existence of the universe? *Logical Death* is philosophical, by all means, and it relies on several hundred references - many from well established sources - in order to put a perspective on reality that you might find unique to anything you thought imaginable. *Logical Death* is not another story of a lifetime struggle of a bipolar to gain some normal behavior in their life – it is a case study in the bad bipolar behavior of a Manic-depressive Junkie, using the ups and downs as a drug for personal satisfaction! *Logical Death* is a bipolar examination of the illogical actions and lifestyle of the so-called ordinary human. It examines the belief in a God, human creativity, the human's place or purpose in the universe, the human's true animal behavior, and bipolar intelligence as a valid mind.

One thing is for certain – never skip a paragraph or a sentence, even if it appears that the science of it is becoming overwhelming, because the bipolar mind during moments of thought disorder will drop you off a cliff mid-sentence. The ability to follow a train of thought without derailment is not a concern for this Manic-depressive Junkie author.

Are manic-depressive's mentally ill or only more sensitive to the artificial lifestyles of modern life? Do humans apply free thought and logic to their daily activities? Are humans no more than animals that have convinced themselves via some contrived language, that they are the supreme animals of the earth? What is the greatest amount of knowledge that we can know about the physical realm of existence and the spiritual realm of God? Is there a need for a god? You must read *Logical Death* in order to find out!

Strange and long sentence formats! No paragraphical logic! Topics bounce in and out of sequence! Written in "Scientific-eroticism!" Editing and grammar errors noted but included! Yes, it can be difficult to read or read quickly, but *Logical Death* has something that is holding the attention of Mathematicians, Doctors, Teachers, Students, Psychologists, working class heroes, and just about anyone that has browsed through it's pages. *Logical Death* will alter the way you read a book as it will the way that you think about life and the human being as an animal - and possibly an animal without a soul. All of your questions of life, purpose, existence, and the scope of the universe will still be left unanswered after reading *Logical Death* - but at least you will understand why you can't know. There are no miracles, no final answers, and definitely no hope for us humans, because perhaps death is the end of existence! "I offer you no hope" is what the book states. Read *Logical Death* to find out why. [As with some books written by manic-depressives it contains adult content

and some adult word use.]
