## **Two-Fisted Science: Stories About Scientists** Jim Ottaviani

*Two-Fisted Science* is the first in a series of books in comics form telling true stories about scientists. This 128 page trade paperback features tales of famous physicists including Hans Bethe, Niels Bohr, Albert Einstein, Richard Feynman, Galileo, Werner Heisenberg, Gottfried Leibniz, Isaac Newton, and Robert Oppenheimer, and Wolfgang Pauli. The stories offer a human context often missing when students learn the equations that bear the scientists' names. Readers, drawn to the book by the compelling anecdotes, will discover intriguing characters that lived real lives beyond ink on paper. End notes and references will lead them to further information on the scientists they've read about.

All stories are written by Jim Ottaviani, a former researcher and nuclear engineer -- now a reference librarian at the University of Michigan in Ann Arbor. The illustrators include award-winning comics artists such as Paul Chadwick, Donna Barr, Bernie Mireault, and Colleen Doran.

The trade paperback is self-published with the generous assistance of a grant from the Xeric foundation. Established by Peter Laird (one of the creators of the "Teenage Mutant Ninja Turtles") each year the foundation awards a select group of comics creators money to bring their work to press. I am grateful to the foundation for their support and confident that you will consider this portion of the "Turtle" fortune well-spent!
