**A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics)** Vladimir V. Tkachuk

This fourth volume in Vladimir Tkachuk's series on  $C_p$ -theory gives reasonably complete coverage of the theory of functional equivalencies through 500 carefully selected problems and exercises. By systematically introducing each of the major topics of  $C_p$ -theory, the book is intended to bring a dedicated reader from basic topological principles to the frontiers of modern research. The book presents complete and up-to-date information on the preservation of topological properties by homeomorphisms of function spaces. An exhaustive theory of  $t$ -equivalent,  $u$ -equivalent and  $l$ -equivalent spaces is developed from scratch. The reader will also find introductions to the theory of uniform spaces, the theory of locally convex spaces, as well as the theory of inverse systems and dimension theory. Moreover, the inclusion of Kolmogorov's solution of Hilbert's Problem 13 is included as it is needed for the presentation of the theory of  $l$ -equivalent spaces. This volume contains the most important classical results on functional equivalencies, in particular, Gul'ko and Khmyleva's example of non-preservation of compactness by  $t$ -equivalence, Okunev's method of constructing  $l$ -equivalent spaces and the theorem of Marciszewski and Pelant on  $u$ -invariance of absolute Borel sets.

### **From reader reviews:**

#### **Norma Lorentzen:**

Reading a reserve can be one of a lot of action that everyone in the world adores. Do you like reading book thus. There are a lot of reasons why people love it. First reading a guide will give you a lot of new information. When you read a publication you will get new information mainly because book is one of various ways to share the information as well as their idea. Second, reading through a book will make you more imaginative. When you studying a book especially fictional book the author will bring one to imagine the story how the personas do it anything. Third, you can share your knowledge to other individuals. When you read this A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics), you could tells your family, friends and soon about yours publication. Your knowledge can inspire average, make them reading a e-book.

#### **Bradley Harshbarger:**

Reading can called imagination hangout, why? Because if you find yourself reading a book specifically book entitled A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics) the mind will drift away trough every dimension, wandering in each aspect that maybe not known for but surely might be your mind friends. Imaging just about every word written in a reserve then become one type conclusion and explanation that maybe you never get ahead of. The A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics) giving you an additional experience more than blown away your thoughts but also giving you useful info for your better life in this particular era. So now let us demonstrate the relaxing pattern is your body and mind is going to be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary spending spare time activity?

#### **John Edmondson:**

This A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics) is great book for you because the content and that is full of information for you who all always deal with world and possess to make decision every minute. This specific book reveal it info accurately using great plan word or we can say no rambling sentences inside it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but hard core information with splendid delivering sentences. Having A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics) in your hand like obtaining the world in your arm, info in it is not ridiculous one particular. We can say that no publication that offer you world in ten or fifteen minute right but this guide already do that. So , this is certainly good reading book. Heya Mr. and Mrs. stressful do you still doubt this?

#### **Dean Herbert:**

In this era globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information much easier to

share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher this print many kinds of book. The actual book that recommended for you is A Cp-Theory Problem Book: Functional Equivalencies (Problem Books in Mathematics) this book consist a lot of the information of the condition of this world now. This particular book was represented how can the world has grown up. The words styles that writer require to explain it is easy to understand. The actual writer made some research when he makes this book. That's why this book acceptable all of you.
