## **Systems Approach to Management of Disasters: Methods and Applications** Slobodan P. Simonovic

The main goal of this text is to introduce the systems approach to disasters management community as an alternative approach that can provide support for interdisciplinary activities involved in the management of disasters. The systems approach draws on the fields of operations research and economics to create skills in solving complex management problems.

The text is organized into four parts. Part I provides an introductory discussion of disaster management including an overview of the main terms used. Part II is devoted to the introduction of systems theory, mathematical formalization and classification of methods. The material presented in this section should be of practical relevance during the process of selecting an appropriate tool for the solution of a problem. Part III is technical in nature, providing a simulation approach and a detailed description of system dynamics simulation. This section details two areas of application: flood evacuation simulation, and disaster risk assessment. Part IV ends with a chapter covering steps to improve disaster management. Finally parts of the book can be used as a tool for specialized short courses for practitioners. For example a course on 'System analysis for emergency management optimization' could be based on Chapters 3, 4 and parts of Chapter 6.

Included in the book is a CD with three computer programs Vensim PLE, LINPRO, and COMPRO. Vensim PLE (Personal Learning Edition) is state-of-the-art simulation software used for the implementation of system dynamics simulation. The other two programs are: LINPRO, a linear programming optimization tool; and COMPRO, for the implementation of the multi-objective analysis tool of compromise programming.

### **From reader reviews:**

#### **Bridget Carter:**

Book is actually written, printed, or created for everything. You can recognize everything you want by a publication. Book has a different type. As we know that book is important matter to bring us around the world. Next to that you can your reading proficiency was fluently. A guide Systems Approach to Management of Disasters: Methods and Applications will make you to be smarter. You can feel more confidence if you can know about every thing. But some of you think that open or reading the book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you trying to find best book or ideal book with you?

#### **Martin Elkins:**

This Systems Approach to Management of Disasters: Methods and Applications book is not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this reserve incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. This kind of Systems Approach to Management of Disasters: Methods and Applications without we comprehend teach the one who examining it become critical in pondering and analyzing. Don't be worry Systems Approach to Management of Disasters: Methods and Applications can bring once you are and not make your bag space or bookshelves' turn into full because you can have it in your lovely laptop even phone. This Systems Approach to Management of Disasters: Methods and Applications having excellent arrangement in word and layout, so you will not really feel uninterested in reading.

#### **Shantel McCary:**

The actual book Systems Approach to Management of Disasters: Methods and Applications has a lot associated with on it. So when you read this book you can get a lot of benefit. The book was published by the very famous author. The author makes some research prior to write this book. This book very easy to read you will get the point easily after reading this article book.

#### **Donald Edmond:**

That reserve can make you to feel relax. This specific book Systems Approach to Management of Disasters: Methods and Applications was colourful and of course has pictures on there. As we know that book Systems Approach to Management of Disasters: Methods and Applications has many kinds or style. Start from kids until teenagers. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book usually are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you and try to like reading which.
