The Scale of Evolution has been Redefined... When ninety-five percent of the Earth's population is suddenly affected by what appears to be a disease that causes widespread insanity and violence, a small group of residents in Parkwood, Indiana--who appear to be immune--struggle to survive frequent attacks and supply shortages as they prepare to leave town in search of a more defensible home. However, when the infected begin to display inexplicable physical and mental changes that create a far greater threat, the group must not only adapt to a world in which little is as it seems, but journey to find the cause--and the cure, if one exists--before being inevitably overrun. It soon becomes clear that their mission is far more dangerous and complicated than any of them could have imagined, and that their war: now against impossible odds and an ever-stronger enemy, may well be unwinnable. But Evolution has no allegiance. As the survivors themselves develop abilities beyond comprehension, they must prepare for a final confrontation with the Great Enemy of the Age: a battle of energies that will determine the fate of all life.
